

**RavenNuke™ Version 2.50.00 released**

Neue RavenNuke™ Version 2.50.00 veröffentlicht

# **Content Management RavenNuke (tm) neue Version 2.50.00**

Nach weit über einem Jahr, Entwicklung wurde jetzt die neueste RavenNuke Version zur Verwendung freigegeben. Neben einem erweitertem News System (Tricked Out News, TON) wurden zahlreiche Elemente entfernt und durch neue, bessere ersetzt. wie zum Beispiel das Download Modul (NSNGD) sowie der neue User Info Block. Zahlreiche Themes und das alte Journal Modul standen schon lange auf der Liste und wurde nun endlich entfernt. Ein Extra Ordner namens Deprecated enthält diese veralteten Dateien, Module, Themes, Blocks und Bilder.

IP2County Dateien in NukeSentinel (tm) wurden aktualisiert. Allerdings hat sich die Version von NukeSentinel (tm) nicht geändert. Es bleibt bei der Version 2.6.03

Die neue RavenNuke Version 2.50.00 macht einen sehr guten Eindruck. Es macht wirklich Spaß damit zu arbeiten. Zudem enthält diese Version zahllose Fixe und Verbesserungen und geht mehr als bisher auf Social Media ein. Ebenfalls enthalten ist ein Block für Tags. Minimum Voraussetzung ist PHP Version 5.2.

Die Change Log gibt Auskunft über alle vom RavenNuke Team durchgeführten Veränderungen.

Die Änderungen im Überblick:

RavenNuke(tm) Running Change Log
